

GUASTAMACCHIA

energia in costruzione

COMPANY
PROFILE
2026

“Our growth is built on a fundamental pillar: technological innovation, which enables us to build according to advanced sustainability standards, while ensuring full compliance with market regulations. Only by operating with absolute dedication and transparency can we guarantee a solid future for both the company and the communities we serve.”

Pasquale Guastamacchia

THE COMPANY

Guastamacchia S.p.A. was founded in 1968 in Ruvo di Puglia, in the province of Bari. Its founder, **Gioacchino Guastamacchia**, then just twenty years old, is today Chairman of the Board of Directors of a company that has never stopped growing and innovating. In 1984, the company became a joint-stock company and **established itself in the construction of major public and private works**, becoming one of the most authoritative general contractors in Italy for the development of thermal and electrical energy systems, as well as air and water treatment plants.

VISION

The company's history and areas of activity clearly show how **its outlook has always been focused on the future**. Its paths have followed—and in some cases anticipated—innovations that have since become an integral part of everyday life. **Our commitment to renewable energy**, for example, dates back to the early stages of these technologies, and today we are among the most reliable companies in the design, construction, and management of renewable energy plants. Our focus on these areas also reflects another distinctive feature of the company: **its strong drive towards environmental sustainability**.

Younger generations are highly sensitive to these issues, and as a result, Guastamacchia has become **a point of reference for young talent**. Those who wish to grow and apply the skills acquired over years of study will find in Guastamacchia a dynamic environment inspired by shared values.

OUR STORY

New terminal at Bari Karol Wojtyła Airport

*Requalification of the Trenitalia High-Speed
Maintenance Facility in Naples Gianturco*

REAL ESTATE

Guastamacchia designs, builds, and markets large-scale residential developments. Notable projects include the Gemma Elite complex in Bari-Carbonara, multi-family villas in Bisceglie, and the residential complex in Bari – San Nicola area.

Integrated residential complex Baridomani – Bari

INFRASTRUCTURE

The company builds and manages public and private structures and infrastructure, placing the utmost attention on the quality of every component and on meeting construction timelines, **always ensuring they are fast and reliable. With more than 50 years of experience, we have developed expertise in the construction of:**

- HOSPITALS
- AIRPORTS
- HEADQUARTERS of public institutions and banks
- SHOPPING CENTERS
- RAILWAY CONTROL CENTERS
- REMOTE CONTROL SYSTEMS for water networks
- PRODUCTION FACILITIES
- MULTI-STOREY PARKING FACILITIES

*Asbestos removal and redevelopment of the RAI
General Directorate on Viale Mazzini in Rome*

RENEWABLE ENERGY

For over 50 years, Guastamacchia has been involved in the development of energy production systems.

For over 50 years, Guastamacchia has been engaged in the production of thermal and electrical energy from renewable sources.

Today, our focus is on **large-scale photovoltaic and wind plants** that we deliver on a turnkey basis for both public and private clients. Guastamacchia directly manages all phases of the plant lifecycle:

- DEVELOPMENT
- FINAL, DETAILED AND CONSTRUCTION DESIGN
- FINANCING
- CONSTRUCTION AND COMMISSIONING
- SALE OF THE PRODUCED ENERGY
- FINAL DECOMMISSIONING OF THE PLANTS with restoration of the site to its pre-existing condition

Le Reni Wind Farm, Matera

OPERATION AND MAINTENANCE

The company provides a continuous, scheduled maintenance and operation service for the completed works. **Two internal operational departments** ensure technical services for **the maintenance, operation, management, and technological upgrading** of systems and the buildings that house them.

This is a fundamental service for users that require constant and proper operation of their systems (such as hospitals or continuous-cycle industrial activities). For this reason, assistance is available

24/7
365 DAYS A YEAR

COLLABORATIONS

Guastamacchia S.p.A. is a member of leading associations such as **Confindustria, ANCE, ANCEFERR, AICARR, Elettricità Futura, and EF Servizi S.r.l.**, and actively participates in their institutional activities. The Chairman of the Board, Gioacchino Guastamacchia, served as AICARR regional delegate for over twenty years, while Eng. Pasquale Guastamacchia holds the position of Vice President of the Energy Section of **Confindustria**.

The company also collaborates with the **Polytechnic University of Bari, the University of Bari**, and various **secondary schools in Puglia**, offering hands-on training opportunities that may lead, for outstanding participants, to employment within the company.

An important ongoing collaboration is currently in place with **the Department of Mechanics, Mathematics, and Management of the Polytechnic University of Bari**, aimed at developing a high-efficiency plant capable of converting solar energy into green hydrogen, to be used in the company's logistics processes. The plant will be installed at the company's new headquarters in the industrial area of Bari/Modugno.
